

Maestro Recovery/Office

One second recovery & Data Backp management form Solution Stand alone PCs

→ System Recovery Procedure

STEP1 Optimal System

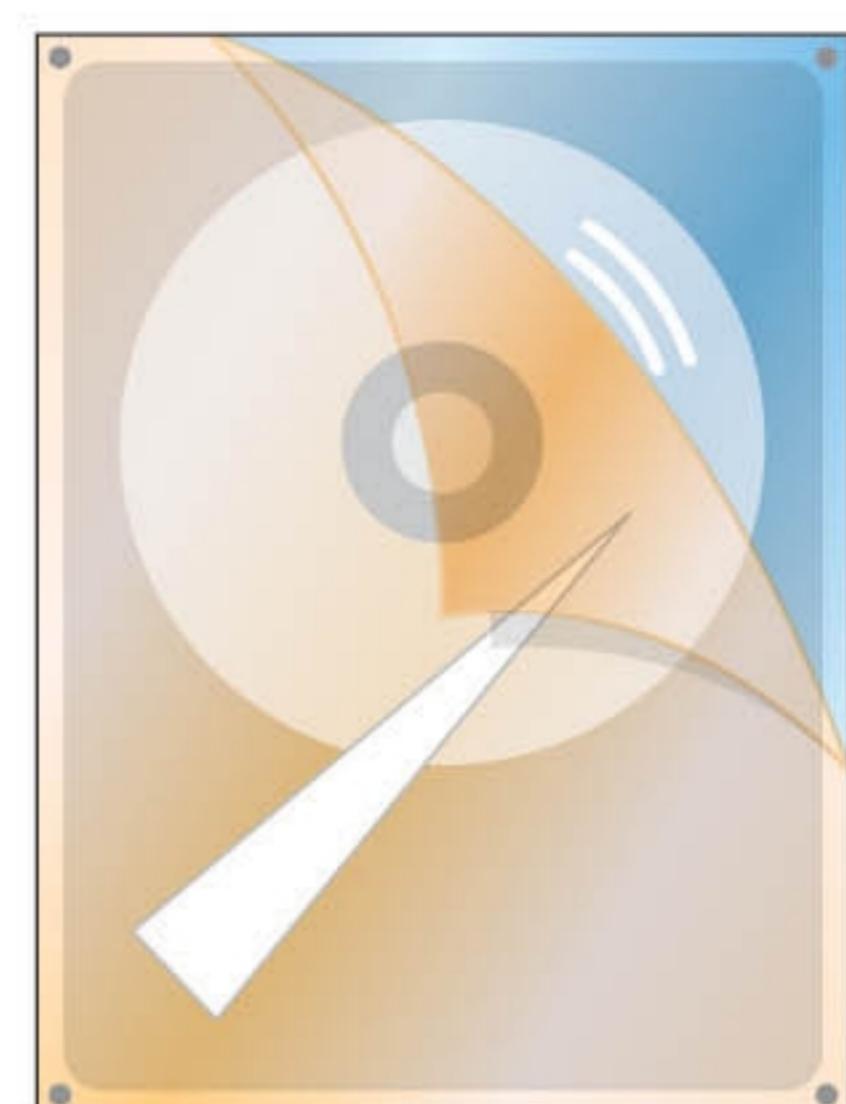

This is the stable system configured by the administrator and is protected by the transparent protection screen.

STEP2 Abnormal System

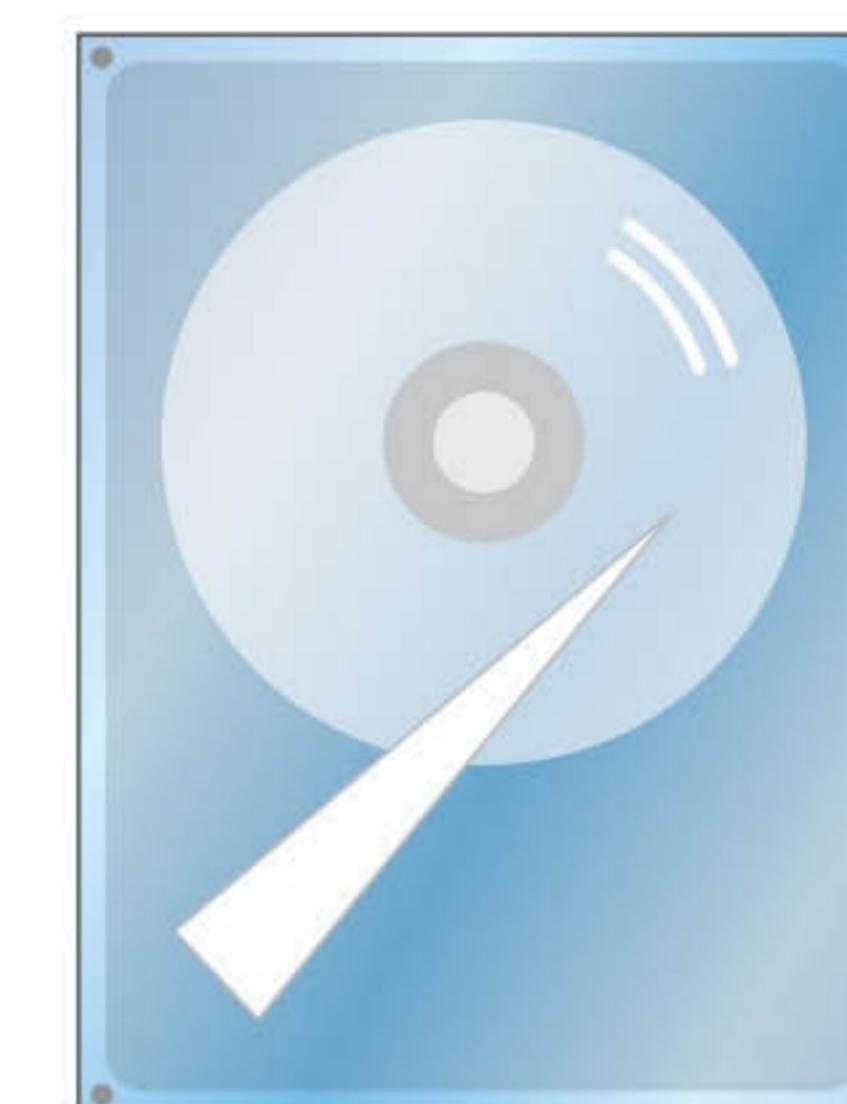

This is the state of malfunctioning due to viruses or malignant codes while the computer is in use.

STEP3 Recovery in Progress

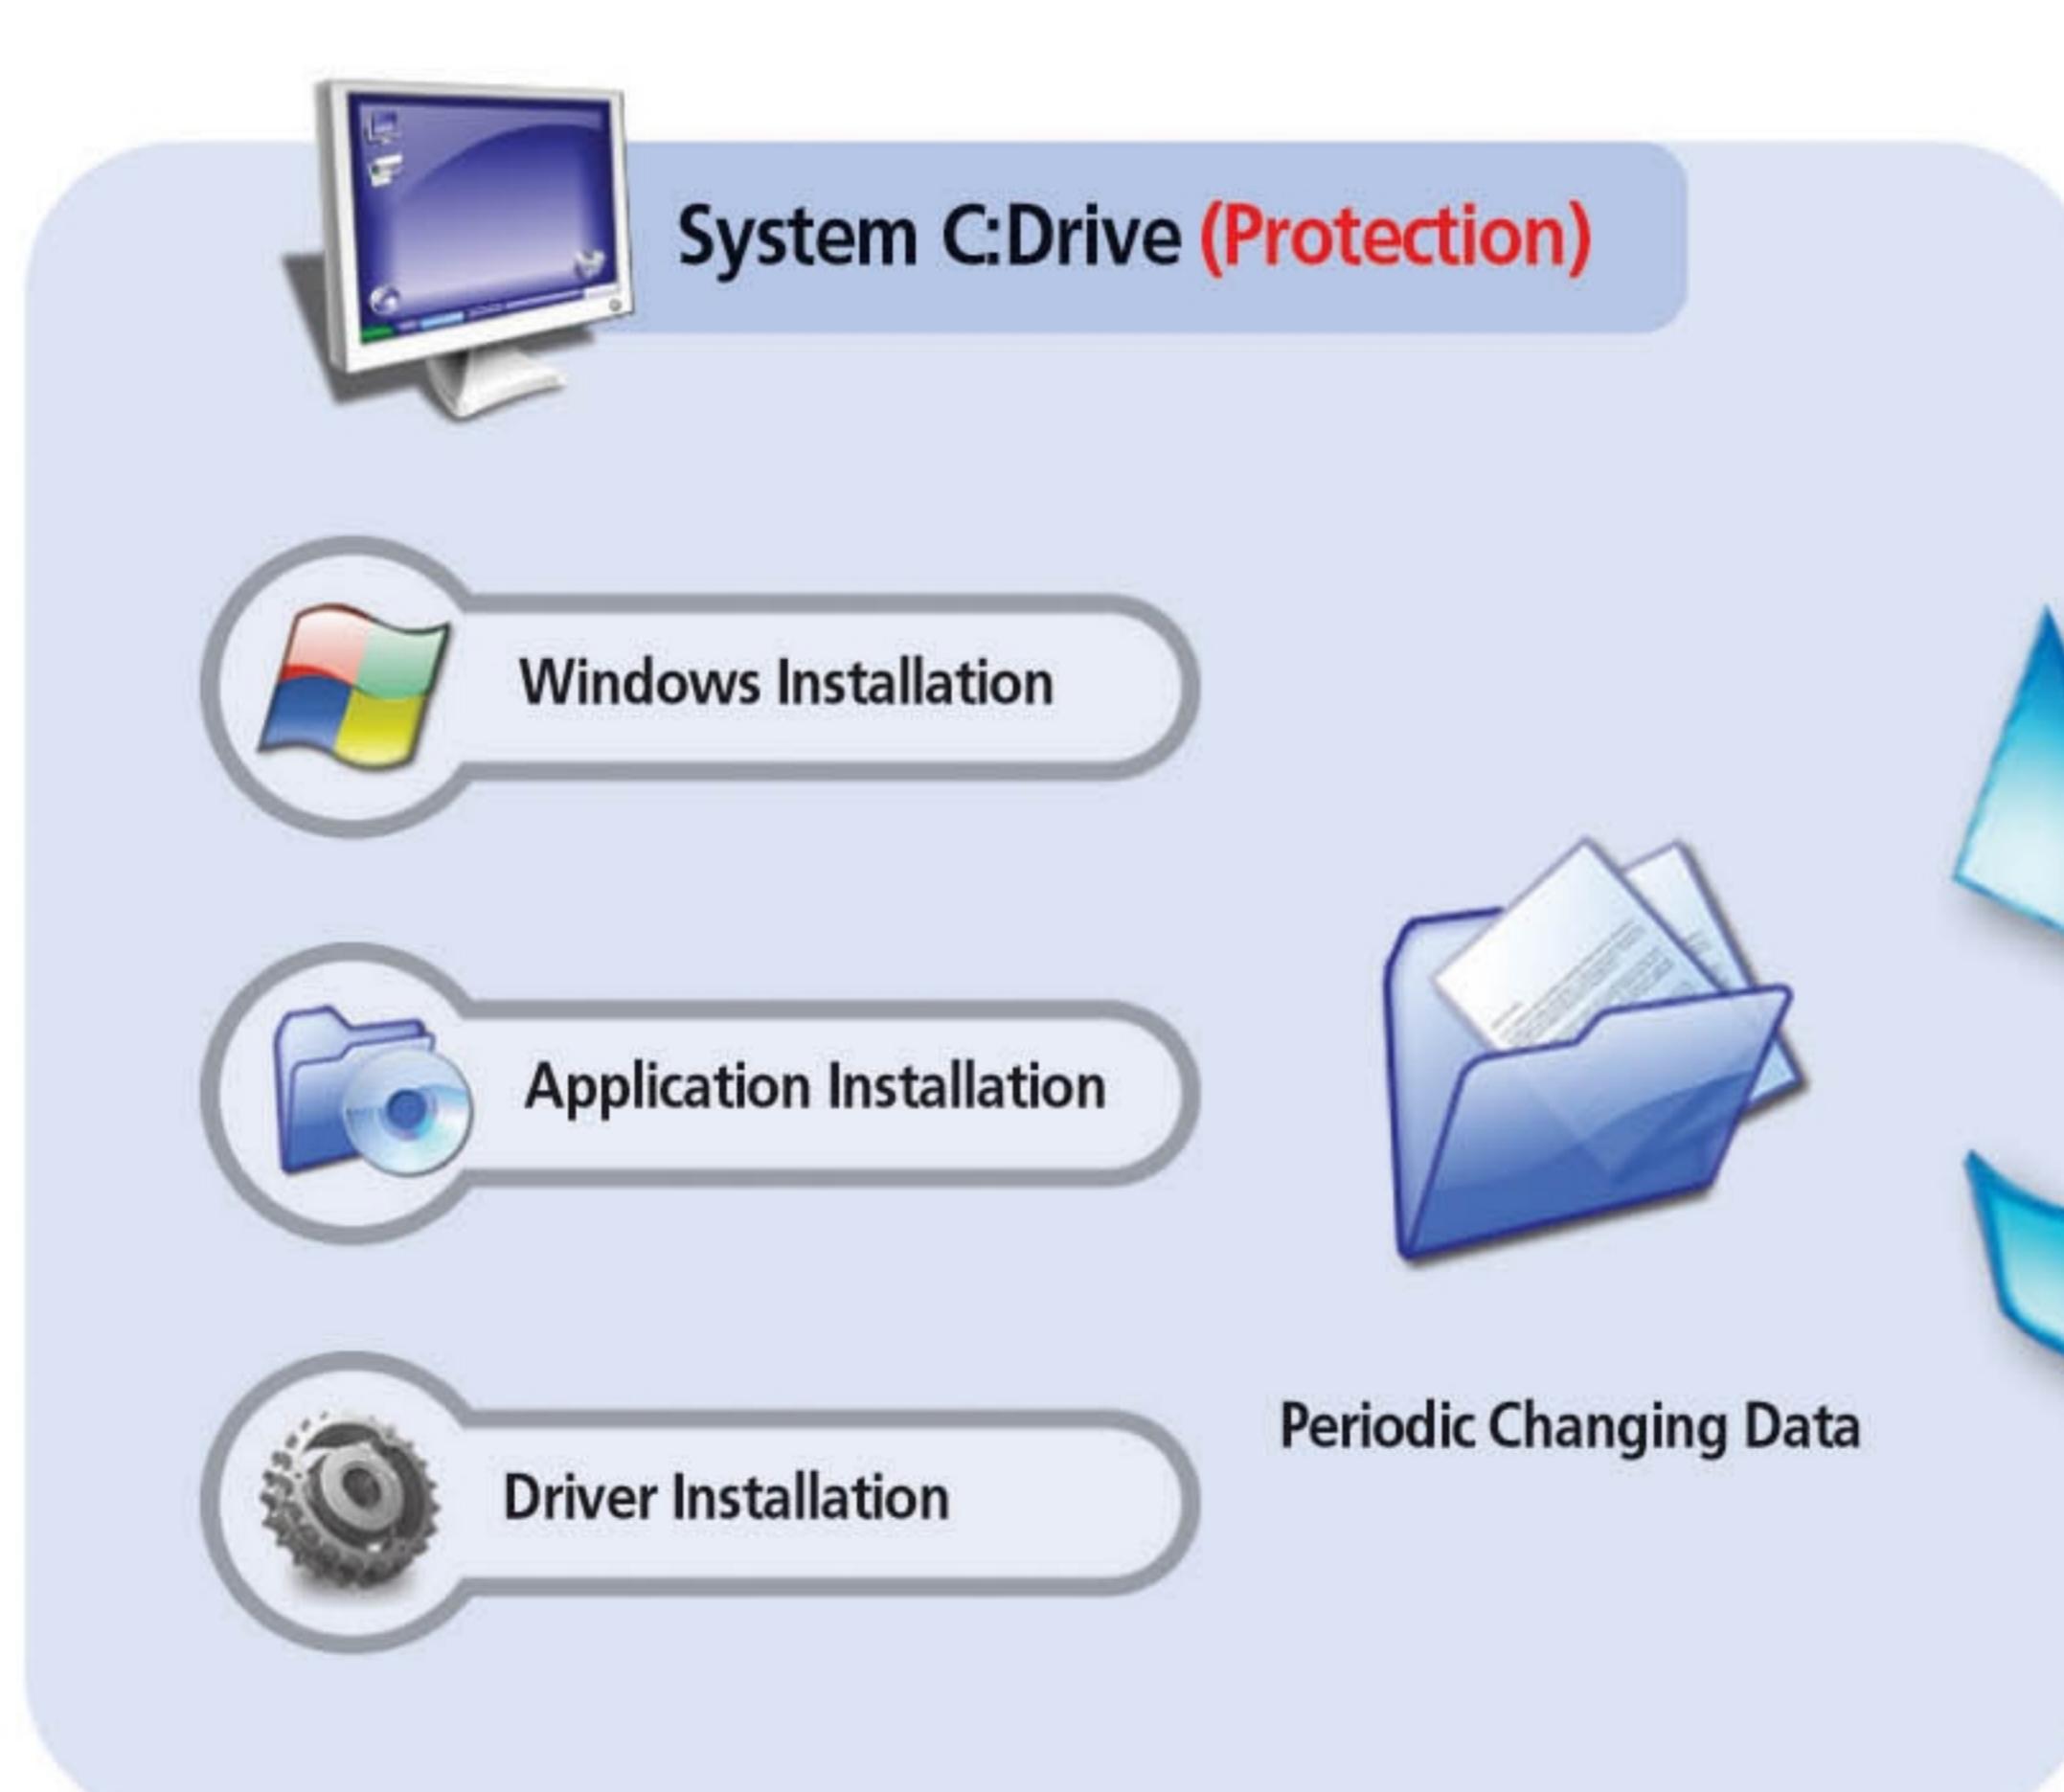

This shows the process of system recovery by peeling the contaminated protection screen much like peeling off an onion (Peel-off Recovery Algorithm applied)

STEP4 Recovery Complete

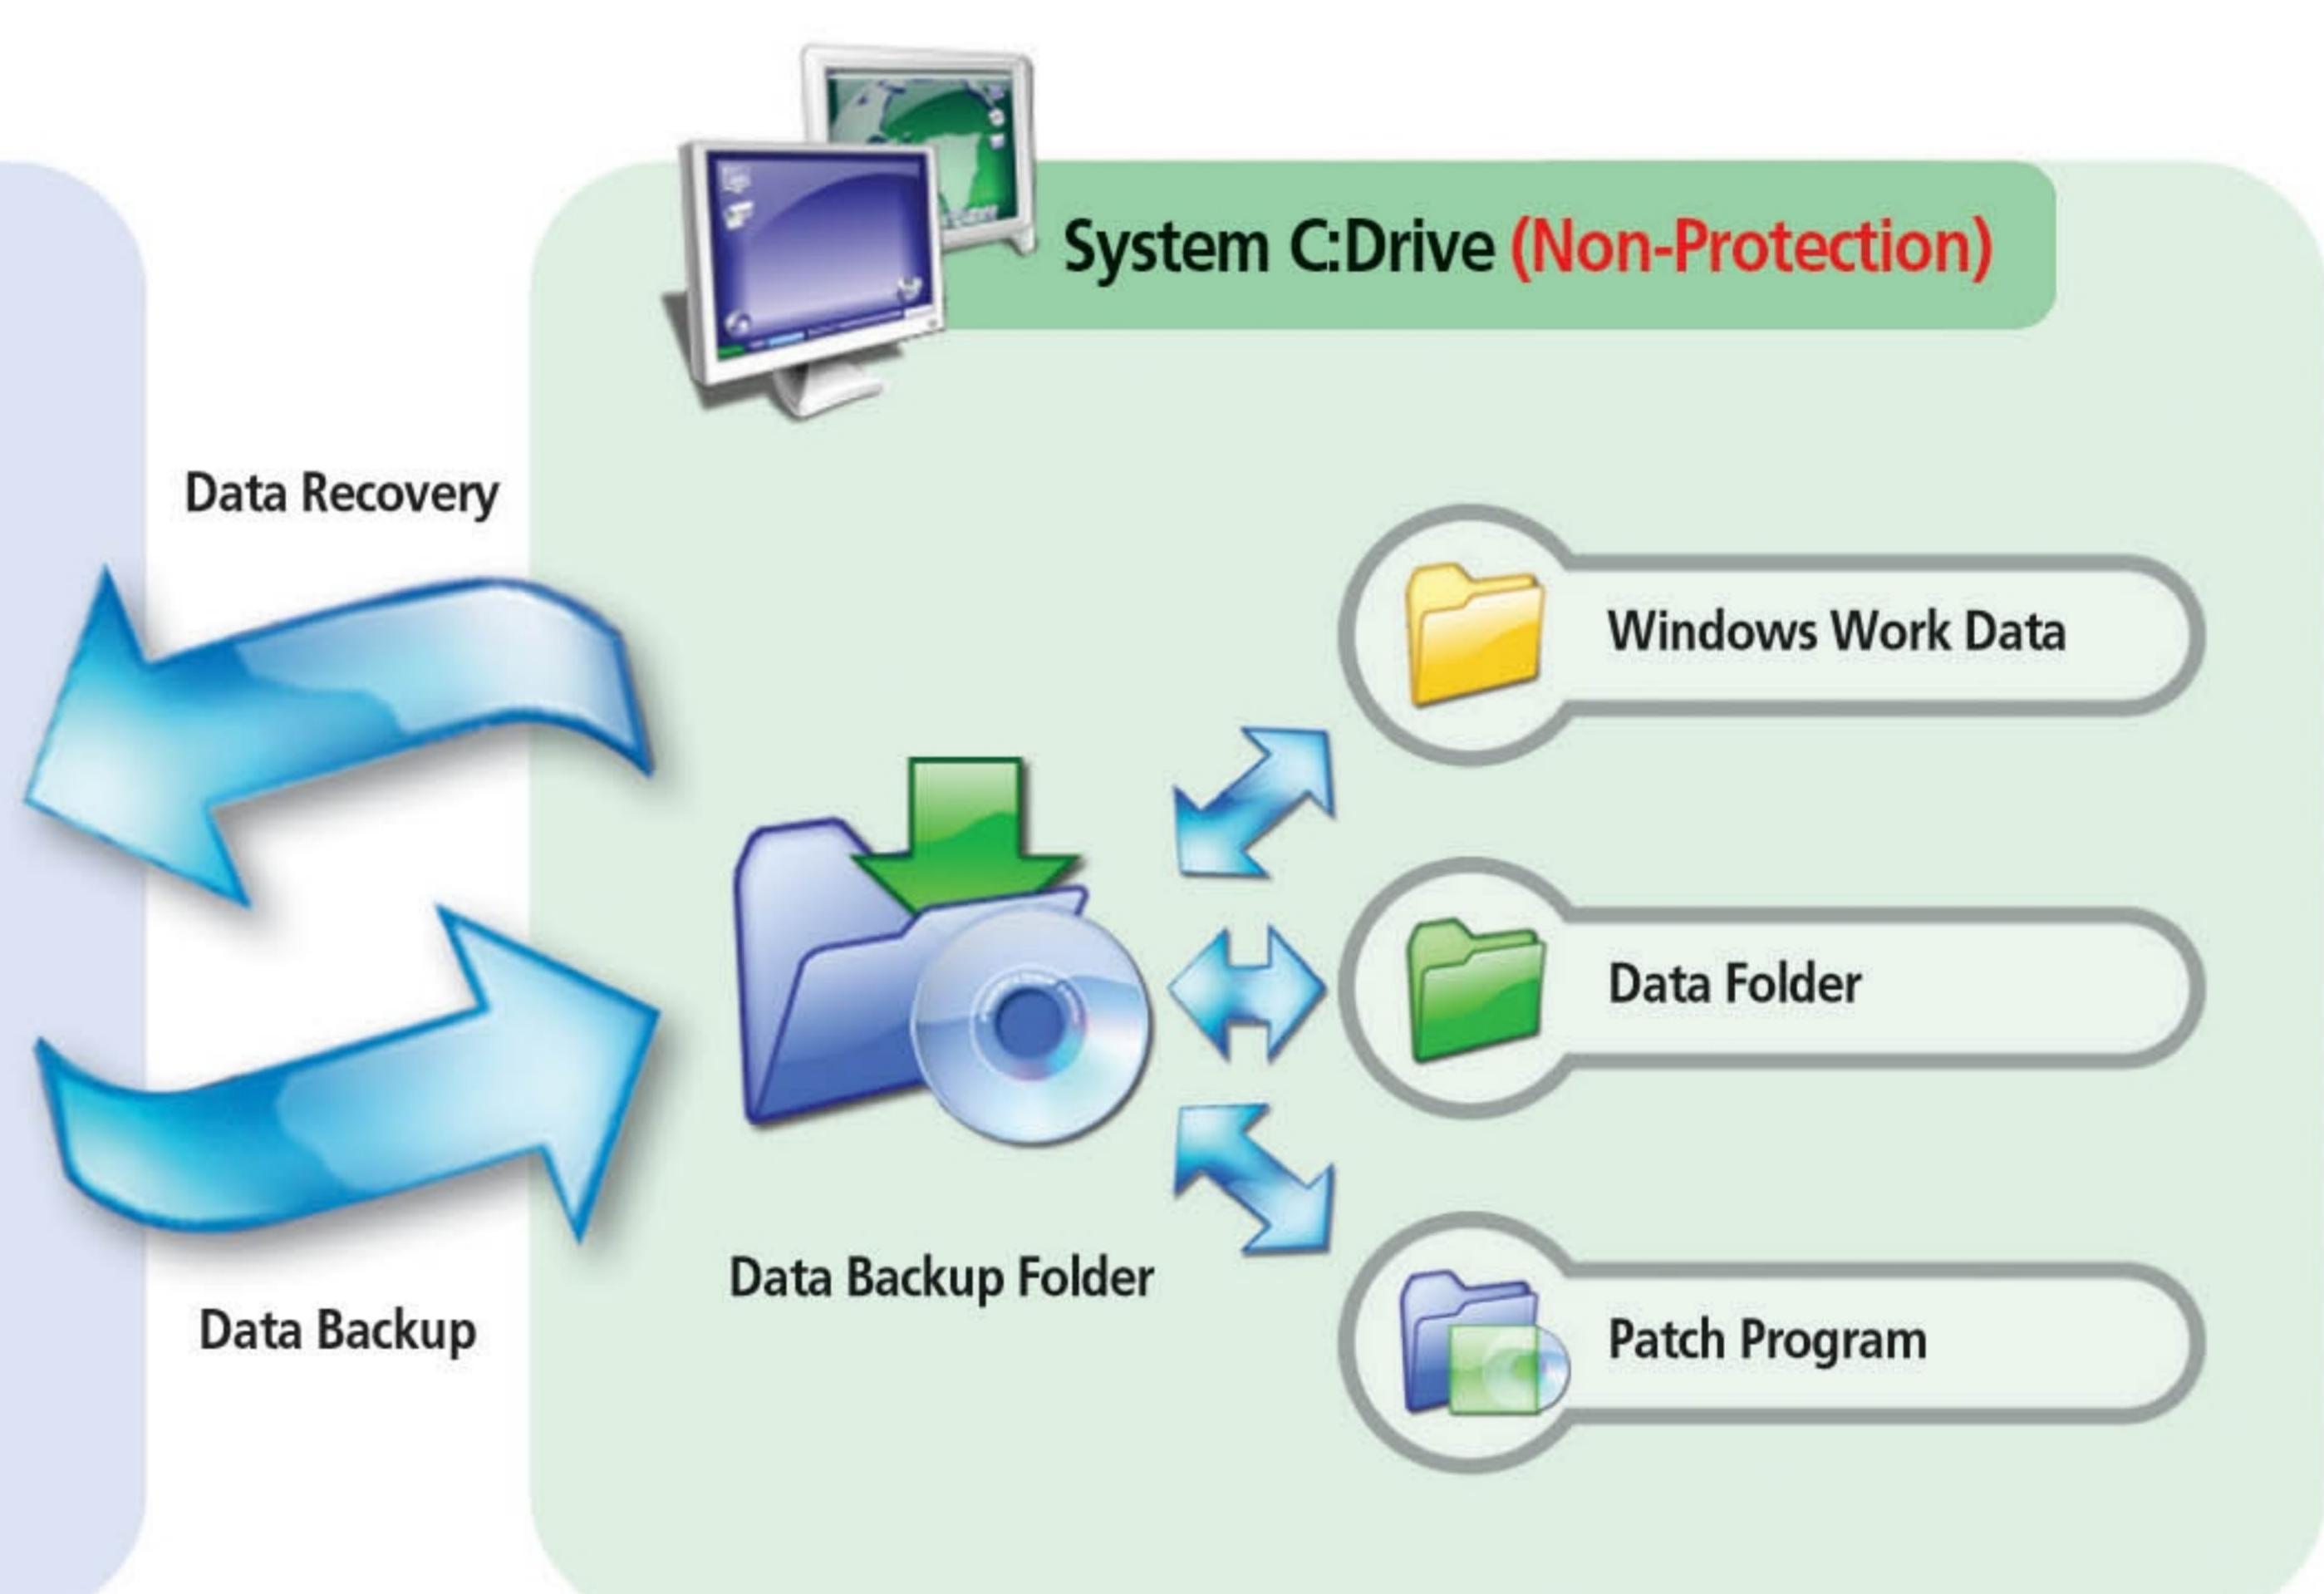

A new transparent protection screen is covered on the system domain(C:) that needs to be protected. (same state as the STEP1)
